IN YOUR INTEREST

NASA/Future Energy Source

In this one-part segment NASA researchers are investigating a lunar mining process that could impact terrestrial energy production. A product called Helium-3 has been deposited on the lunar surface by the solar wind for eons. Twenty-five metric tons of Helium-3 could provide enough energy to generate all of the electricity used in this country for one year.

NASA/Find Fish

Image processing software called ELAS developed at NASA's Stennis Center is now being used to manage and preserve fish populations in the gulf of Mexico. By applying ELAS to a standard NOAA satellite view, researchers at the national Marine Fisheries can predict where certain species of fish should be on a given day. This capability is a much needed tool for evaluating fish populations in the gulf and setting critical catch limits. And by reducing search times, it can also save the fishermen thousands of dollars in fuel costs..wavings which could in turn be passed on to the consumers.

SCOTT NEWMAN/ COCAINE

This spot was written by a teenager. The subject is drug abuse. A businessman is talkin on the phone about a deal while handling some cocaine. The V.O. says, "this bag costs about 1 thousand dollars on the street." The scene then switches to a morgue with a body bag being slid into the wall. The V.O. says, "this bag costs about \$4.25, not a very good return on your investment, is it?"
